BIRTHING A NEW WORLD:
GLOBAL INTERCONNECTEDNESS OF WEALTH, POVERTY, AND LIBERATION

At this equipping session, we will look at GWP's 42 year history of education about the dynamics of wealth and privilege, poverty and instability, and the empowerment of women and girls throughout the world and ask: Are things getting better or worse? What has changed for women and girls in the US and in other countries? Where do we find hope? How can we put our energy, resources, and prayers to best use?

Participants who attend this session will leave with greater knowledge about their interconnectedness with others around the world as well as concrete ways to create a more equitable global community.
